

Access to Memory (AtOM) - Bug #13572

Base URL being appended to remote digital object URLs on export

10/05/2021 11:07 AM - Dan Gillean

Status:	Verified	Start date:	10/05/2021
Priority:	Medium	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	Release 2.7.0	Tested version:	2.7
Google Code Legacy ID:		Requires documentation:	No
Sponsored:	No		

Description

- Find or create a description with a digital object linked via URI. Example in the public demo data: Flora Roy Fonds
- Add the description to the clipboard and export
- Open the resulting CSV and look at the URL in the digitalObjectURI column

Resulting error

- Base URL is being appended to remote URI links, making them malformed - example:
<http://demo.accesstomemory.orghttp://images.ourontario.ca/Partners/WLU/44222.jpg>

Expected outcome

- Base URL is only used as needed during the construction of locally uploaded digital objects
- Remote digital objects linked via URL do not have the system Base URL appended on export

History

#1 - 11/01/2021 08:00 PM - Steve Breker

- Status changed from New to Code Review
- Assignee set to Steve Breker

PR: <https://github.com/artefactual/atom/pull/1468>

#2 - 11/02/2021 12:36 PM - Steve Breker

- Status changed from Code Review to QA/Review

Merged.

Tested with attached local file, linked local file, linked url image.

#3 - 11/17/2021 08:59 AM - Dan Gillean

- Status changed from QA/Review to Verified
- Assignee deleted (Steve Breker)
- % Done changed from 0 to 100
- Requires documentation set to No
